

Water-resistant quartz clock with crossed second hands: the water-resistant clock for every pool

The standard version of this training clock has a strong, white metal casing (RAL 9016). The casing has a protection category of IP 54 (N 60 529). The clock casing is also available in metallic silver (White aluminium RAL 9006) at an additional cost, or is available in other colours on request. Stainless steel matt finish V4A casing (1.4571 X6CrNiMoTi 17-12-2) also available at an additional cost. Each swimmer takes their own times. The four hands, each in a different colour, show the time that has passed. One full rotation takes 60 seconds. This stainless steel version is also saltwater and chlorine resistant.

Product information:

- Size (HxW): 600x600 mm
- Depth approx. 120 mm

Clock face:

- Easy-to-read metal dial (min. readable distance. 30 m)
- White lacquered
- With red/black second increments and black digits.

Hands:
