

## Water polo goals

“Pool edge fastening”, folding, 3 × 0.90 m

**Technical features:** These water polo goals – “Pool edge fastening” type – have been designed in the same manner as the “Free floating” version – but without the floats. This system thus also features the same decisive advantages. A special anchoring system enables the goals to be attached to any pool edge no matter what the design of channel.

**Standard equipment:** White powder coated crossbar/upright structures. When ordering, it is essential to state:

1. pool edge system and distance from top of the pool edge to water level
2. distance of pool edge to centre of sockets
3. inside diameter of sockets

### Cat.-no. 410

Incl. net hoops, pool edge fastening set for 42 mm inside diameter sockets (without sockets) and Safety system net holders

### Cat.-no. 411

Suitable special nets, 4 mm, green, incl. tensioning cords

Owing to different water depths, these goals may also, of course, be supplied in other sizes at additional cost.

## Ground socket

for water polo goals, type “Pool edge fastening”

**Technical features:** Made of thick-walled aluminium tubing, total length 100 mm, with welded-on bottom plate and recessed cap

**Standard equipment:** Natural bright aluminium finish, inside diameter 42 mm

### Cat.-no. 412

## Water polo goals

“Free floating”, Type “Super Goal”, 3 × 0.90 m

**Technical features:** This kind of goal is a construction of a modern design.

The floats are made of stable aluminium parts and delivered in one piece. The lateral floats comprise the special foam material for the upwelling of the goals.

Round corners in the back part of the float construction reduce the danger of being injured.

The crossbar/upright construction is made of aluminium special profile 75 × 40 mm, white powder coated, net hoops of stable aluminium tubes of 40 mm diameter.

Mounting is very simple as due to the special construction only crossbar/upright construction and net hoops have to be mounted to the floats.

To guarantee a steady location in the water weights are provided in the back part of the float construction.

Of course two-point line attachments are mounted at the floats acc. to international regulations.

The net is fixed at the crossbar/upright construction with the Safety system net holders invisible below the floats.

**Standard equipment:** Floats of matt silver anodised finish, crossbar/upright construction white powder coated

**Cat.-no. 402**

**Cat.-no. 403**

Suitable special nets, 4 mm, white

## Transportation rollers

for water polo goals, Type “Super-Goal”

**Cat.-no. 404**

The rollers are laterally screwed below the floaters and remain there permanently.

1 set comprises 8 rollers (for 1 pair of goals of the Cat.-no. 402).

## Water polo goals

“Free floating”, folding, 3 × 0.90 m

The major improvement:

With just a minimum of effort – without expensive dismantling – the floats with net hoops are simply clipped on to the crossbar/upright structure.

- folding stable structure with rigid joints. All components are able to operate independently of each other so that no design-dependent fractures can occur
- unsinkable due to foam-filled floats with slanted front
- quick, extremely simple counter-balancing
- carry out just once, and then forget about it
- two-point line attachment to the special floats
- steady location in water
- free hanging net – thus no undesirable hoops in the centre of the goal
- screw-in rust-resistant net hooks
- powder coated
- quick, easy assembly and disassembly
- compact storage – passes through the smallest doorway

Already at the 1980 Olympic Games in Moscow, these water polo goals were used to the fullest satisfaction of organizers and players alike.

**Standard equipment:** White powder coated crossbar/upright structure

**Cat.-no. 400**

Incl. net hoops, counterweights and Safety system net holders

**Cat.-no. 401**

Suitable special nets, 4 mm, green, incl. tensioning cords

## Pool official's chair

“Folding”

The pool official's chair matched to the most stringent requirements – there is no better. A proven construction which has thoroughly stood the test of time – both at home and abroad.

**These facts speak for themselves, though a number of technical features should be highlighted:**

Extremely stable, steady and elegant design. Maintenance-free – assured by aluminium finish. “Folding” feature provided through application of special hinges between seat and support. Space-saving storage is thereby assured.

Ladder part with especially wide and non-slip steps. Matching spars are also made of wide special profiles.

Stability assured by disc feet. Through bores in the disc feet, additional anchoring of the chair by ground pegs is possible.

Fatigue-free and comfortable sitting posture by application of a UV-resistant perforated moulded seat plastics of correct anatomical design.

Wide writing board of weatherproof plastics.

Low freight costs, since the unit is packaged in two cartons.

**Standard equipment:** Natural bright aluminium finish.

Incl. UV-resistant, perforated plastic moulded seat, writing board, string bag, disc feet, and 2 clothes hooks.

**Cat.-no. 505**
