

"Prima Super" training clock: a resilient pool clock

"Prima Super" training clock is ideal for your swimming training. Each training clock is covered with a protective layer of anodised aluminium, making it strong and resilient. In addition, the protective front panel made of acrylic glass protects it from temperature fluctuations and the weather. The back panel is made of PVC, meaning the training clock is also optimally protected against spray. The hands are marked in 4 different colours, so that every swimmer can see their time as quickly as possible. The clock enables split times to be displayed during swimming training as well as swimming warm-ups. Wait until the colour of the hand for the respective swimmer is at 60 (zero) and make a note of it. The 4-coloured crossed hands of the Sport-Thieme "Prima Super" training clock then show the elapsed time. One revolution corresponds to 60 seconds.

Please note:

The clock is suitable for sheltered or roofed outdoor and indoor use, and is splash-proof. Keep out of direct sunlight.

Product information:

- Material of casing: anodised aluminium
- Material of front panel: acrylic glass (3 mm), UV- and weather-resistant, withstands temperatures of -40 to +70 degrees, fire protection class B2
- Material of hands and back panel: 3-mm PVC "Forex" hard foam, fire protection classification B1, weather-resistant
- 4-coloured cross hands
- 1 revolution in 60 seconds

More information:

30×30-cm tabletop model

- Battery-operated (1×LR 6 AA)
- Start/stop switch made of V4A
- Can be read from: approx. 10 m

67×67 cm wall model

- Electrically powered (24 V) with 20-m cable
- Transformer in mains plug
- 4-coloured crossed hands
- 1 revolution in 60 seconds
- Can be read from: approx. 30 m

90×90 cm wall model

- Electrically powered (24 V) with 20-m cable
- Transformer in mains plug
- 4-coloured crossed hands
- 1 revolution in 60 seconds
- Can be read from: approx. 50 m
